REVOLUTIONISE YOUR HOT WATER

Providing a direct, **energy efficient**,
solution to your hot water necessities.

A+

Off-Peak Eco Power

Set your cylinder to only operate during off-peak low-cost hours with Eco Power Mode, to further save on your electricity.

Easy Simple Installation

The Project CÜRv hot water cylinders are simple to install. With plug and play functionality like an electric water heater, easy to install and replace.

Multiple Air Ducting Set-Up

Utilise ambient air or extract fresh air from outdoors, the air sourced hot water cylinders have multiple ducting installation set-ups.

Fast Water Heat Up Time

The Project CÜRv air sourced hot water cylinders come with a powerful compressor built-in as standard, this enables faster water heat up times.

Micro-Channel Condenser

The micro-channel condenser has larger contact surface for better heat transfer performance and less refrigerant consumption.

Heating your water alongside infrared technology or GCH, opt for our sleek, smart electric powered hot water cylinder.

To understand how your Air Sourced Hot Water Cylinder works, just think of how a refrigerator works: it transfers the heat present inside it to the surrounding environment. The Cürv® Air Sourced Hot Water Cylinder reverses the cycle by subtracting heat from the air to transfer it to the water.
